Professional Qualification Recognised by Regione Toscana

FCAA students interested in obtaining an additional professional qualification recognised by Regione Toscana may apply during their second year of study at the Academy.

Main Requirements for Participation

- Italian-language proficiency at a minimum B1 level, demonstrated by an official certificate accepted for participation in the regional qualification programme.
- A minimum group of eligible students, as established and communicated by the Academy, in accordance with applicable regional requirements.
- Written confirmation of interest by TR application form, together with the required B1 certificate, must be submitted to the Academy no later than the end of February of the second year of study.

Programme Activation and Conditions

Provided that all eligibility requirements are met, the minimum number of participants is reached, and the necessary regional approval is obtained, the Regione Toscana-recognised qualification pathway will be integrated into the third year of the FCAA Three-Year Academic Programme, with no additional tuition fees.

Activation of the recognised qualification pathway is subject to approval by the competent regional authority for the relevant edition and compliance with all applicable requirements.

FCAA reserves the right not to activate, or to postpone or suspend the recognised qualification pathway should the required conditions not be met or cease to be satisfied, including insufficient eligible enrolment, missing language certifications, attendance-related issues, or other applicable academic or administrative requirements, subject to the relevant regional regulations.

The availability of the Regione Toscana qualification is conditional and does not constitute a guaranteed component of the standard FCAA Three-Year Academic Programme.

The non-activation, postponement, or suspension of the regional qualification pathway does not affect students’ enrolment in or continuation of the standard FCAA academic programme.

Internship, Examinations and Certification

The recognised qualification pathway includes a mandatory professional internship. Participating students must fulfil all applicable attendance requirements, complete the required training components, and successfully pass the final examinations, which are conducted in Italian.

The regional qualification is awarded exclusively upon successful completion of all mandatory programme requirements. Final examinations and assessments are conducted by an independent examination board appointed by Regione Toscana.

Continuation of the Standard FCAA Academic Programme

If the minimum eligible group is not formed, the necessary regional approval is not obtained, or other applicable activation requirements cannot be satisfied, students will continue their standard FCAA Three-Year Academic Programme without interruption.

Upon successful completion of their academic studies, students will receive the FCAA institutional diploma, independently of whether the Regione Toscana-recognised qualification pathway has been activated.

No additional tuition fees are charged for participation in the regional qualification pathway, should it be activated, despite the exam taxes.

Further Information

Full information about the programme, its structure, eligibility criteria, and applicable Regione Toscana requirements, contact the FCAA office.
